

FeneVision Release Notes

CORE Version: 18.07

Ability to hide part and option pricing in WEB 45149

Smarter Dealer Quoting for Commercial Projects - Manufacturers can now enable dealers to quote project-level jobs in WEB-hiding part/option pricing and showing a total job price for cleaner, client-ready quotes.

New BI Report for Showing All Items with Exceptions At Delivery 45184

Enhanced Delivery & Logistics Visibility - A new BI report highlights delivery exceptions helping logistics teams stay proactive.

Ability to support LAMI and IG in CAD in WEB 43425

Dealer-Driven CAD Quoting for LAMI & IGU Units - Dealers can now quote fabricated LAMI and IGU units (alongside MONO) in WEB with automatic CAD drawing generation. Manufacturers benefit from enhanced Order Import support, including auto-handling of non-scorable edges.

Ability to trigger policy hold at Order Entry when acknowledging orders with past due invoices, Business Central 43789

Users can now take advantage of a new, automated credit control-block order acknowledgement when customers have past-due invoices in Business Central via a configurable policy hold. This enhancement extends the existing FeneVision-Business Central integration to improve financial compliance at the order acknowledgement stage.
